

4 Compresseur – exemple d'un cycle thermodynamique

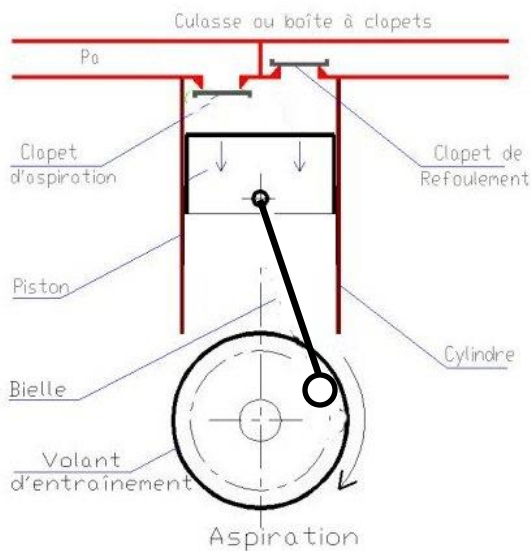

A-B: Compression jusqu'à P_2

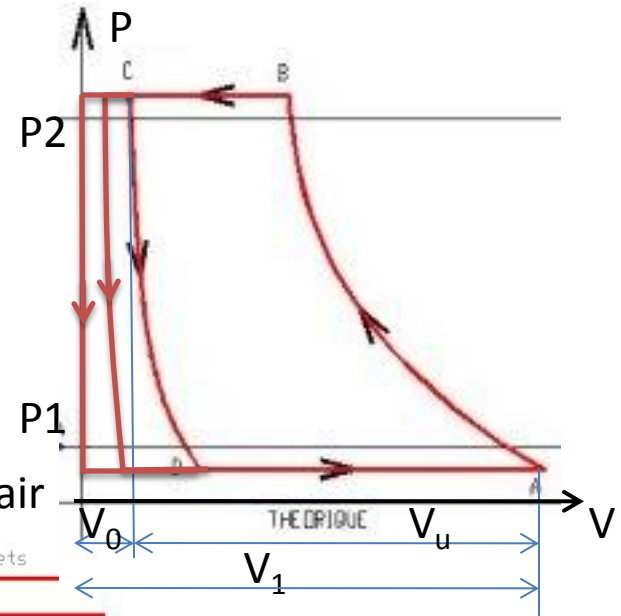

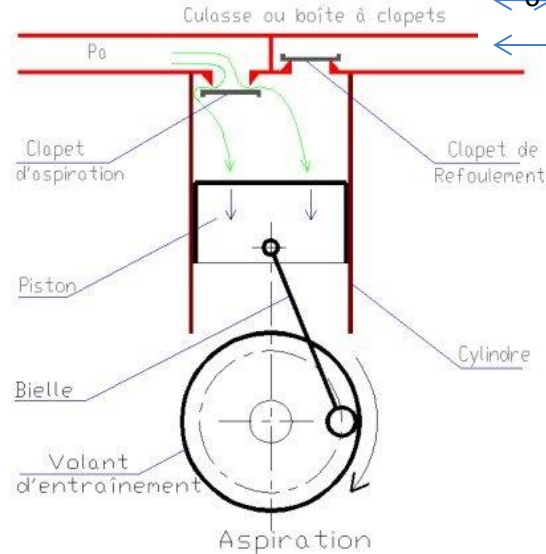

B-C: Refoulement de l'air

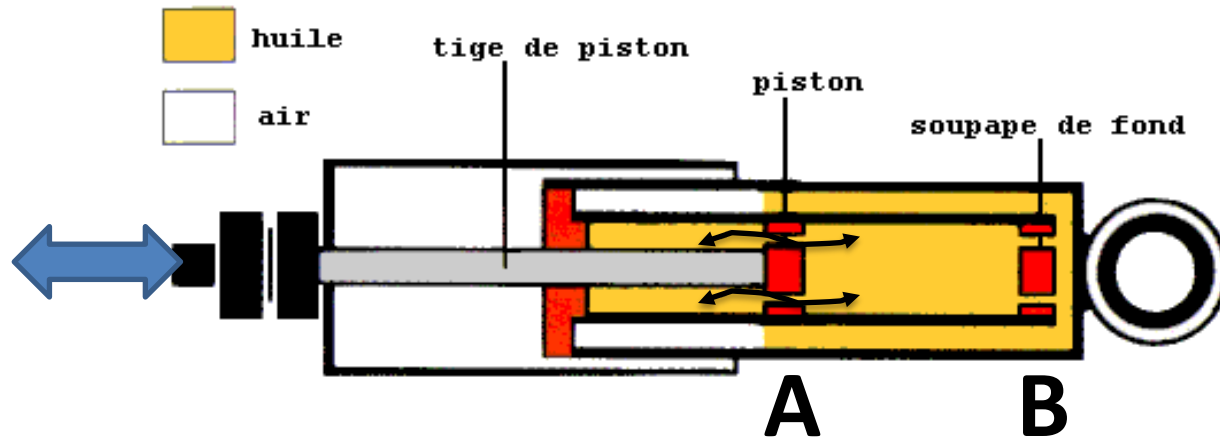

C-D: Détente jusqu'à P_1

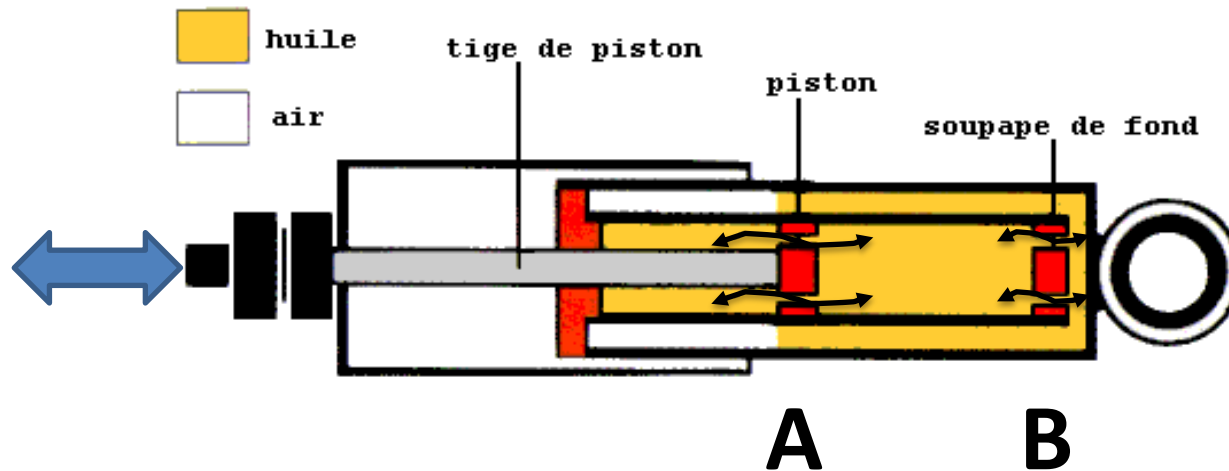

D-A: Aspiration de l'air

5 Amortisseur

Faibles oscillations/ faible pression → fluide passe par grande orifice **A**

Grandes oscillations/ forte pression → fluide passe par grande orifice **A** et petite orifice **B**
