COURSE BOOKLET
3^{ème} année – semestre 2 (S6)
année 2017/2018

Responsable Pédagogique : Françoise STOREY
fstorey@polytech.unice.fr

3rd year / 2nd term 2017-18 (S6) ENGLISH COURSE

COURSE OBJECTIVES:

To develop general English skills in listening, speaking, reading, writing and communication. We will work on excerpts taken from the PBS film "Digital Nation":
<http://www.pbs.org/video/1402987791/>

- To develop vocabulary and grammar (cf. vocabulary list at the end of this booklet). First half of the list was studied during the 1st term. Most activities on Jalon: <http://jalon.unice.fr/>. Many activities on: <https://sites.google.com/site/polytechniceenglish/home>
- To develop professional communication like writing a proper covering letter and emails.
- To develop general communicational skills. Workshops and activities in oral and written expression, using the press, podcasts, videos, etc.
- To develop listening & reading comprehension in order to attain a B2 European level of English (equivalent to at least 785/990 TOEIC® points). At the beginning of the term, a full mock test will be taken in class in order to assess progress made since September (2 hours or 45mn+1h15mn needed). The test will not be taken into account in the final grade.
- Frequent speed-reading activities will be organized during the term (TOEIC style or not)
- Oral presentations in pairs
- Mid-term exam on listening comprehension & language skills (vocabulary & grammar). Final exam on reading comprehension & language skills.

EVALUATION:

- | | |
|--|--------------------------------------|
| 1. Continuous assessment: | 50% of final English mark |
| ➤ Active participation in class: | 15% |
| ➤ Drills & activities | 15% |
| ➤ Oral presentation | 20% |
|
2. Exams in class: mid-term and final |
50% of final English mark |
| ➤ Thank you for justifying all absences by email (preferably written in English☺) | |
| ➤ BONUS POINTS (up to 2) added on general average for carrying out the VIP (Victory Is Possible) program (includes 20 hours of attendance at the Centre de Ressources en Langues). Contact your instructor or Françoise Storey for more information: fstorey@polytech.unice.fr | |

PRESENTATIONS in pairs

Reading from a script is not allowed (use cue cards with a few key-words only)

If you want to do your presentation in a Pecha Kucha style, watch this video (optional): <https://www.youtube.com/watch?v=wGaCLWaZLI4>

Duration of the presentation in normal style, with slideshow: 10mn maximum.
1st slide: indicate who the speakers are (First name + Last name, in this order).

Finish with a question in order to introduce a debate.

Topics available:

1) A **topical issue**, ex:

- * should there be limits to freedom of expression?
- * should enhanced surveillance of all citizens on the web be developed?
- * should we be afraid of intelligence amplification?
- * should we be afraid of big data and predictive analytics?
- * should we be afraid of the technological singularity?
- * should we be afraid of nanotechnology?
- * should we make human clones?
- * should we continue to develop nuclear power?
- * should we...?

Develop arguments FOR/AGAINST; analysis needs to be well researched; personal opinion given in the conclusion.

2) A **present-day invention or innovation** (in engineering or science), with a few technical details, expected and imagined impact on our world, well-researched analysis

Or: An **invention** (in engineering or science) that revolutionized our habits, with a few technical details and impact on its time, well researched analysis. A history of ... (with future evolutions).

Or: The **best innovation of the year** in your opinion, with a few technical details, what was done before, what will it change?

3) More **artistic or creative presentations**, like for example a passage from a play. Shakespeare, Pinter, Beckett? Take a passage from a play that you have read or seen and deliver it in front of the class (8-10mn, with props and costumes). Beware of pronunciation and intonation.

- ✓ **Slideshow** is compulsory for subjects 1) and 2) only (Prezi recommended: <http://prezi.com/>).
- ✓ Avoid colours like green and red (except to draw attention to a specific point)
- ✓ Check your material BEFORE class starts: solve any technical detail with the technician (T. Nedelec, 2nd floor)
- ✓ To visualize your computer on the main screen, push: Fn F8
- ✓ Don't forget your Bibliography at the end (or "References")
- ✓ **BEWARE OF PLAGIARISM**: any sentence or idea that you took from a book, periodical or website (ex: Wikipedia) should be written between quotation marks and the reference should appear clearly at the bottom of the slide, or at the end.
- ✓ **The slides are for the audience, not for the presenter, who should not even look at them** (except when reading a quotation or describing trends or other data)

The teacher WILL interrupt the presentation if there is any reading.

Planet of the phones

The smartphone is ubiquitous, addictive and transformative

Feb 28th, 2015 | *The Economist*

THE dawn of the planet of the smartphones came in January 2007, when Steve Jobs, Apple's chief executive, in front of a rapt audience of Apple acolytes, brandished a slab of plastic, metal and silicon not much bigger than a Kit Kat. "This will change everything," he promised. For once there was no hyperbole. Just eight years later Apple's iPhone exemplifies the early 21st century's defining technology.

Smartphones matter partly because of their ubiquity. They have become the fastest-selling gadgets in history, outstripping the growth of the simple mobile phones that preceded them. They outsell personal computers four to one. Today about half the adult population owns a smartphone; by 2020, 80% will. Smartphones have also penetrated every aspect of daily life. The average American is buried in one for over two hours every day. Asked which media they would miss most, British teenagers pick mobile devices over TV sets, PCs and games consoles. Nearly 80% of smartphone-owners check messages, news or other services within 15 minutes of getting up. About 10% admit to having used the gadget during sex.

The bedroom is just the beginning. Smartphones are more than a convenient route online, rather as cars are more than engines on wheels and clocks are not merely a means to count the hours. Much as the car and the clock did in their time, so today the smartphone is poised to enrich lives, reshape entire industries and transform societies—and in ways that Snapchatting teenagers cannot begin to imagine.

Phono sapiens

The transformative power of smartphones comes from their size and connectivity. Size makes them the first truly personal computers. The phone takes the processing power of yesterday's supercomputers—

even the most basic model has access to more number-crunching capacity than NASA had when it put men on the Moon in 1969—and applies it to ordinary human interactions. Because transmitting data is cheap this power is available on the move. Since 2005 the cost of delivering one megabyte wirelessly has dropped from \$8 to a few cents. It is still falling. The boring old PC sitting on your desk does not know much about you. But phones travel around with you—they know where you are, what websites you visit, whom you talk to, even how healthy you are.

The combination of size and connectivity means that this knowledge can be shared and aggregated, bridging the realms of bits and atoms in ways that are both professional and personal. Uber connects available drivers to nearby fares at cheaper prices; Tinder puts people in touch with potential dates. In future, your phone might recommend a career change or book a doctor's appointment to treat your heart murmur before you know anything is amiss.

As with all technologies, this future conjures up a host of worries. Some, such as "text neck" (hunching over a smartphone stresses the spine) are surely transient. Others, such as dependency—smartphone users exhibit "nomophobia" when they happen to find themselves empty-handed—are a measure of utility as much as addiction. After all, people also hate to be without their wheels or their watch.

The greater fear is over privacy. The smartphone turns the person next to you into a potential publisher of your most private or embarrassing moments. Many app vendors, who know a great deal about you, sell data without proper disclosure; mobile-privacy policies routinely rival "Hamlet" for length. And if leaked documents are correct, GCHQ, Britain's signals-intelligence agency, has managed

95 to hack a big vendor of SIM cards in order
to be able to listen in to people's calls. If
spooks in democracies are doing this sort
of thing, you can be sure that those in
authoritarian regimes will, too.
Smartphones will give dictators
100 unprecedented scope to spy on and corral
their unwilling subjects.

The naked app

Yet three benefits weigh against these
threats to privacy. For a start, the autocrats
105 will not have it all their own way.
Smartphones are the vehicle for bringing
billions more people online. The cheapest
of them now sell for less than \$40, and
prices are likely to fall even further. The
110 same phones that allow governments to
spy on their citizens also record the
brutality of officials and spread
information and dissenting opinions. They
feed the demand for autonomy and help
115 protest movements to coalesce. A device
that hands so much power to the
individual has the potential to challenge
authoritarianism.

The second benefit is all those personal
120 data which companies are so keen on.
Conventional social sciences have been
hampered by the limited data sets they
could collect. Smartphones are digital
census-takers, creating a more detailed
125 view of society than has ever existed before
and doing so in real time. Governed by

suitable regulations, anonymised personal
data can be used, among many other
things, to optimise traffic flows, prevent
130 crime and fight epidemics, measuring
screen time by age group and device type.

The third windfall is economic. Some
studies find that in developing countries
every ten extra mobile phones per 100
135 people increase the rate of growth of GDP-
per-person by more than one percentage
point—by, say, drawing people into the
banking system. Smartphones will remake
entire industries, at unheard-of speed.

140 Uber is a household name, operating in 55
countries, but has yet to celebrate its fifth
birthday. WhatsApp was founded in 2009,
and already handles 10 billion more
messages a day than the SMS global text-
145 messaging system. The phone is a
platform, so startups can cheaply create an
app to test an idea—and then rapidly go
global if people like it. That is why it will
unleash creativity on a planetary scale.

150 By their nature, seminal technologies ask
hard questions of society, especially as
people adapt to them. Smartphones are no
different. If citizens aren't protected from
prying eyes, some will suffer and others
155 turn their backs. Societies will have to
develop new norms and companies learn
how to balance privacy and profit.
Governments will have to define what is
acceptable. But in eight short years
160 smartphones have changed the world—and
they have hardly begun.

A/ Reading comprehension questions:

Answer the following questions, not repeating the article, but using your own words:

- 1) What makes the smartphone so popular?
- 2) What, according to the article, is the future of the smartphone?
- 3) Is the author of the article worried about health or addiction problems related to smartphone use?
- 4) Why is the author not worried about the question of privacy?
- 5) Do you share his optimism? How do you see the future of communications?

B/ Vocabulary

C/ Language skills : comparing

1) Make a list of all comparative and superlative forms in the article.

2) Make a list of all adverbs finishing with -ly, and find their meaning
Ex : partly (line12) = 'en partie' in French

REVISIONS : INFINITIF ou GERONDIF ?

Le gérondif

Le gérondif a la même forme que le participe présent (V-ing). Il s'agit d'un verbe employé comme nom. Il s'emploie dans les situations suivantes :

1. Comme sujet de la phrase :
 - Ex. *Smoking damages your health.* Fumer nuit à votre santé.
2. Comme complément :
 - Ex. *I like skiing.* J'aime faire du ski.
3. Après une préposition :
 - Ex. *Are you interested in working for us?* Cela vous dirait de travailler pour nous ?
 - Ex. *Tim's very good at building sand castles.* Tim est très doué pour construire des châteaux de sable.
4. Il s'emploie souvent avec les verbes suivants : **admit, avoid, consider, delay, deny, detest, dread, enjoy, envisage, fancy, feel like, finish, imagine, involve, keep, mind, miss, postpone, practise, recall, regret, resent, risk, stop, suggest** (traductions ci-dessous).
 - Ex. *It has stopped raining.* La pluie s'est arrêtée.
 - Ex. *I dread going to the dentist's.* Je redoute aller chez le dentiste.
5. Pour parler d'une action terminée, on peut employer le gérondif ou le gérondif parfait (having done, having eaten, etc).
 - Ex. *Penny regretted having changed jobs.* Penny a regretté d'avoir changé de travail.

L'infinitif

1. Après ces verbes, on emploie l'infinitif : **afford, agree, aim, appear, arrange, ask, choose, consent, dare, decide, decline, demand, expect, fail, forget, hope, learn, manage, offer, plan, prepare, pretend, promise, refuse, seem, swear, tend, threaten, want, wish** (traductions ci-dessous).
 - Ex. *Owen pretended to be asleep.* Owen a fait semblant de dormir.
 - Ex. *The boss refused to give us a day off.* Le patron a refusé de nous donner un jour de congé.
2. Après les verbes suivants, on peut employer un mot en WH + infinitif : **ask, decide, explain, forget, know, remember, understand**.
 - Ex. *He forgot what to say.* Il a oublié quoi dire.
 - Ex. *Do you know how to play the piano?* Savez-vous jouer du piano ?
 - Ex. *I don't know whether to tell him or not.* Je ne sais pas si je devrais le lui dire ou non.
 - Aussi **show / tell / ask** someone what / how / where to do something.
 - Ex. *Tell me how to do this exercise. I don't know what to do.* Dites-moi comment faire cet exercice. Je ne sais pas quoi faire.
3. Il y a l'infinitif parfait (to have + participe passé) et l'infinitif progressif (to be + participe présent) que l'on emploie surtout après les verbes **appear, pretend, seem**.
 - Ex. *Arnold seems to have enjoyed himself.* Arnold semble s'être amusé.
 - Ex. *Arnold seems to be enjoying himself.* Arnold semble s'amuser.
4. Après **dare**, on peut employer l'infinitif avec ou sans particule.
 - Ex. *He doesn't dare to ask for a raise. He doesn't dare ask for a raise.* Il n'ose pas demander une augmentation.
5. Après **would like** on met l'infinitif.
 - Ex. *I would like to be taller.* J'aimerais être plus grand.

L'infinitif ou le gérondif

Après certains verbes on peut mettre ou l'infinitif ou le gérondif.

1. Après **begin, can't bear, continue, intend, love, start** on peut mettre ou l'infinitif ou le gérondif.
 - Ex. *I can't bear getting up early. I can't bear to get up early.* Ces deux phrases ont le même sens, à savoir "Je ne supporte pas de me lever tôt".
2. Après **like** on emploie le gérondif lorsqu'il s'agit d'apprécier quelque chose et l'infinitif lorsqu'il s'agit de trouver cela bien de faire quelque chose (sans nécessairement le trouver agréable).

- Ex. *I like playing polo.* J'aime jouer au polo. => Cela me plaît.
- Ex. *I like to go to the dentist's twice a year.* Je trouve cela bien d'aller chez le dentiste deux fois par an. => Je trouve qu'il est bien (ou nécessaire) d'y aller. Cela ne me plaît pas pour autant.
- 3. Après *stop* on met le gérondif lorsqu'il s'agit d'arrêter quelque chose; mais on met l'infinitif lorsqu'il s'agit d'arrêter ce que l'on est en train de faire afin de faire autre chose.
 - Ex. *He has stopped smoking.* Il a arrêté de fumer. => Il avait fumé, mais maintenant il a arrêté.
 - Ex. *He stopped to look at the shop window.* Il s'est arrêté pour regarder la vitrine. => Il a arrêté de marcher ou de conduire de façon à pouvoir regarder la vitrine.
- 4. Après *remember* on met l'infinitif lorsqu'il s'agit de se rappeler quelque chose **avant** de le faire; on met le gérondif lorsqu'il s'agit de se rappeler quelque chose **après** l'avoir fait.
 - Ex. *Did you remember to feed the cat?* Avez-vous pensé à donner à manger au chat ? => Je veux savoir si vous vous êtes rappelé de donner à manger au chat, et si ensuite vous l'avez fait.
 - Ex. *Yes, I remember feeding the cat before leaving for work.* Oui, je me rappelle lui avoir donné à manger avant de partir pour le travail. => Je vous assure que je me souviens d'avoir donné à manger au chat.

Email model (one among many possibilities):

Dear Ms Baggioli,

I am a 20 year-old graduate engineering student in Polytech'Nice-Sophia, specializing in... (computer science/ applied mathematics/ water engineering, etc). I am writing to you as I would like to apply for a training period in your company from 1-30 June 2018.

I had the pleasure of meeting you during the Engenious student convention last December and I was particularly impressed by Fansoft's line of software and company values.

Please find enclosed a copy of my CV and a cover letter.

I am available for an interview at your convenience.

Looking forward to hearing from you soon,

Yours sincerely,

Emilie Dupont

3rd year graduate engineering student
