

Gestion de projet avec les outils Atlassian

Philippe Collet

D'après de la documentation de Sébastien Mosser

Polytech'Nice Sophia - 2017-2018 - SI3

□ Besoins généraux

- Collaboration d'une équipe structurée sur un même projet
- Gestion de tâches, features, tickets...
- Gestion de configuration/version/sources
- Plate-forme web collaborative à distance (web)

Atlassian JIRA

- un système de suivi de bugs**
- un système de gestion d'incidents**
- un système de gestion de projets**
 - développé par Atlassian Software Systems
 - <https://www.atlassian.com/fr/software/jira>
- En fait, tout un écosystème de solutions de gestion de projet informatique et d'outillage**
 - Couplages entre eux, à la demande

Le ticket à tout faire

□ Principe : Issue dans JIRA

- Utilisé pour tous les éléments de gestion du projets

□ Issues pour

- Tâches et sous-tâches du projet
- Demandes de fonctionnalités
- Rapports de bug
- Demande d'évolution
- Réunion

□ Etats du ticket

Ticket : création

Create Issue – JIRA @ Univ. de Toulon

Assign to me

Original Estimate * 32h (eg. 3w 4d 12h) ?

The original estimate of how much work is involved in resolving this issue.

Description * Il s'agit de tester les fonctionnalités considérées comme utiles au projet. On y conçoit donc des scénarios que des prototypes de tests permettront de valider. On s'assure ainsi de savoir développer toutes les fonctionnalités nécessaires à notre projet.
De plus, nous prévoyons une courte étude de faisabilité et une prise de recul, respectivement au début et à la fin de chaque lot. Cela nous permettra d'évaluer les différents choix de petite envergure que nous faisons. Les

Time Tracking

Estimated:

Ticket: cycle de vie

Open : Issue

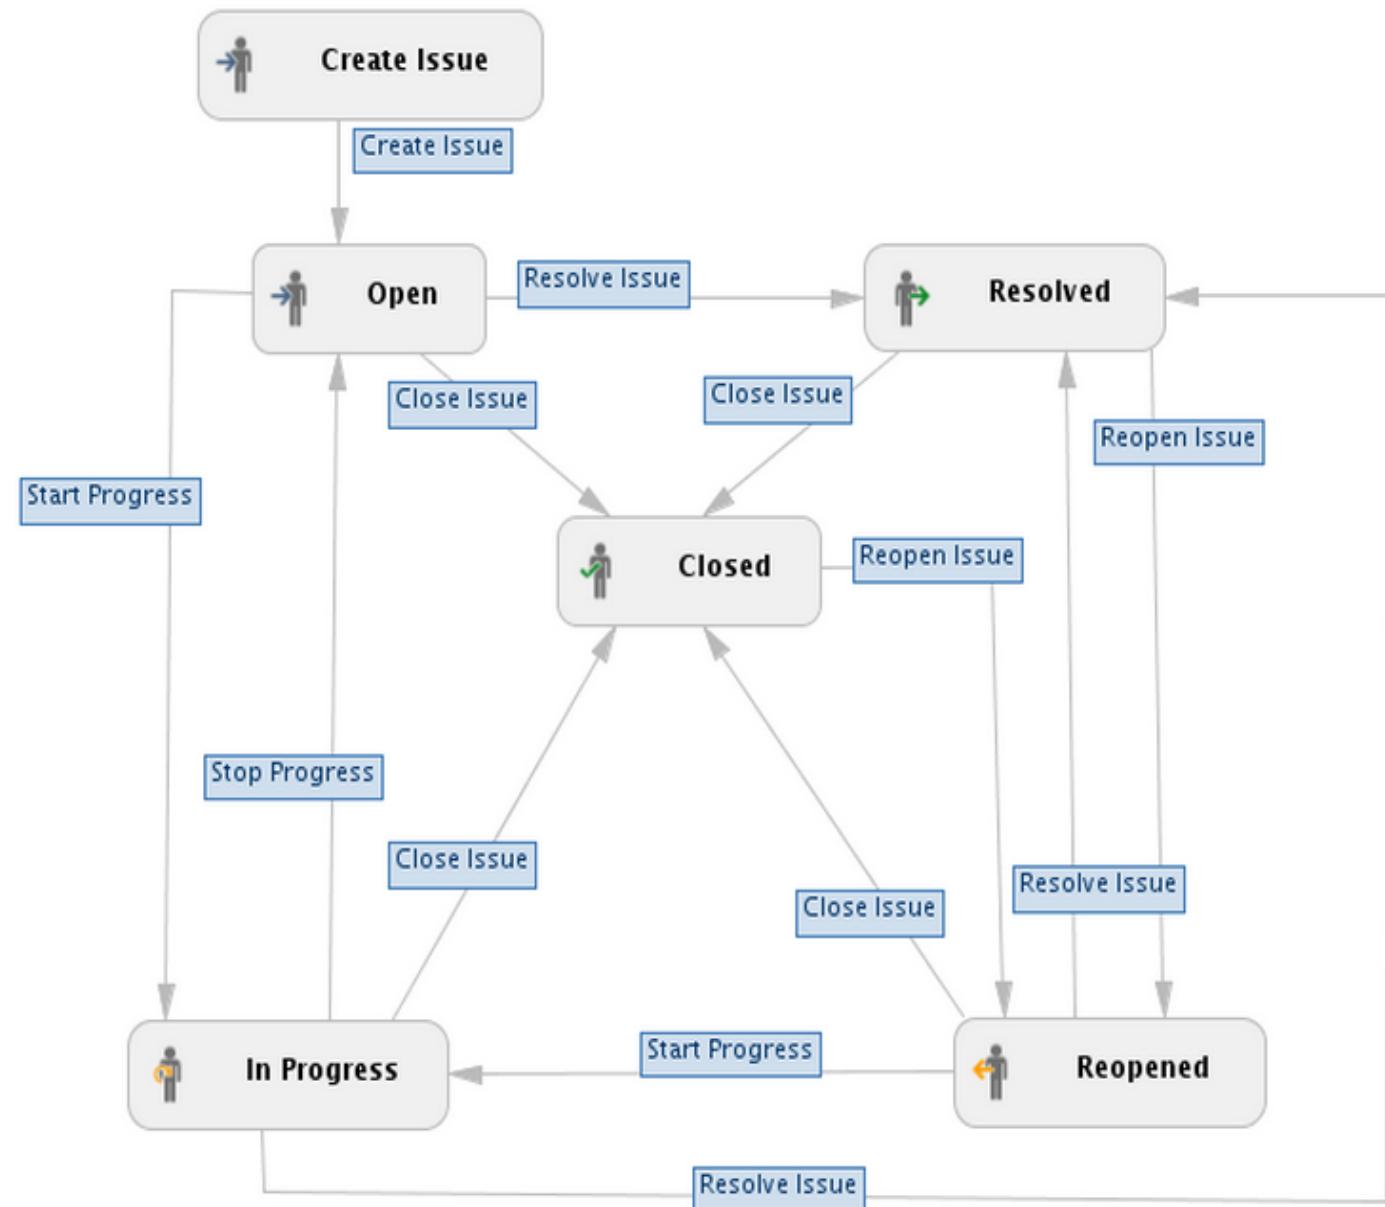

nouvellement créée (état initial);

In Progress : Du travail a lieu en ce moment sur cette issue;

Resolved : Le travail est terminé, l'issue attend une vérification finale;

Closed : Le travail fait est OK, l'issue est terminée de manière satisfaisante;

Reopened : Le travail fait est rejeté, l'issue est de nouveau ouverte.

Bitbucket : gestionnaire de version

- Outil séparé mais lié à JIRA
- Rappel d'une bonne config côté git

```
$ git config --global user.name "Nom Prénom"
$ git config --global user.email email@unice.fr
```

Bitbucket : utilisation

□ L'unité de base Git est le “*commit*”.

- Il est possible de lier un *commit* à une ou plusieurs *Issue(s)* JIRA en mettant simplement l'identifiant de l'*Issue* dans le message de commit

□ Les deux outils sont alors capables d'exploiter ce lien pour:

- Depuis Bitbucket: afficher les détails de la tâche associée au commit actuel
- Depuis JIRA : afficher tous les commits reliés à cette tâche dans l'onglet “Source”

Author	Commit	Message	Commit Date	Issues
 mosser	2bcad90	PFEET-4 Première version du DoW	1 hour ago	PFEET-4
 mosser	228fab3	first commit	3 hours ago	

- Dans la liste des commits BitBucket, si un identifiant de ticket est utilisé dans le message, l'outil rajoute une colonne “Issue” à droite

Issue JIRA vue depuis Bitbucket

The screenshot shows a web browser window with the following details:

- Address Bar:** https://atlas.polytech.unice.fr/stash/projects/PFEET/repos/public/commits
- Header:** Shows tabs for "[PFEET-4] Li1 - DoW - JIRA", "Eagles' Tool / public - Stash", and "Eagles' Tool / public - Stash". The main navigation bar includes "Stash", "Projects", "Repositories", a search bar ("Find a repository..."), and user icons.
- Content Area:**
 - Title:** JIRA Issues
 - Project & Issue:** Eagles' Tool / PFEET-4, Li1 - DoW
 - Details Section:** Includes fields for Type (Deliverable), Priority (Major), Status (Resolved), and Assignee (Stéphane Muller).
 - Description Section:** Contains the text: "Formalisation de la planification projet. Contient, le sujet, l'état de l'art, la planification détaillée et une description de la mise en œuvre du projet et des participants".
 - Buttons:** A "Close" button at the bottom right of the modal.

Onglet Source dans JIRA, connecté aux commits Bitbucket

The screenshot shows a JIRA issue page for ticket PFEET-4. At the top, there's a navigation bar with tabs like 'Edit', 'Comment', 'Assign', 'More', 'Close Issue', and 'Reopen Issue'. On the right, there are 'Share' and 'Export' buttons. Below the navigation, there's a 'Description' section containing a project summary. To the right, there are sections for 'Votes' (0), 'Watchers' (1), and 'Dates' (Due: 18/Nov/12, Created: Last Monday 2:32 PM, Updated: Last Monday 4:50 PM, Resolved: Last Monday 4:50 PM). Further down, there's a 'Collaborators' section and an 'Agile' section with a 'View on Board' button. The main content area features a 'Activity' tab selected, showing a list of commits. One commit by user 'mosser' from 'PFEET-4' is highlighted, showing it added 'DoW.txt' to 'Eagles' Tool / public'. A 'View full commit' button is next to the commit message. At the bottom, there are links for 'Atlassian JIRA (v6.0.4#6100-sha1:6b05df6)', 'About JIRA', and 'Report a problem'. A footer note states: 'Powered by a free Atlassian JIRA community license for Polytech'Nice Sophia Antipolis School of Engineering. Try JIRA - bug tracking software for your team.'

Kanban

- Mot japonais signifiant enseigne, panneau, étiquette
- Pratique basée sur l'utilisation d'étiquette (post-it) pour matérialiser les informations sur le processus

Kanban : historique

□ Méthode inventée à la fin des années 1950 dans les usines Toyota

- Mise en place entre deux postes de travail
- Une simple fiche cartonnée fixée sur les bacs de pièces dans une ligne d'assemblage ou une zone de stockage

□ Intérêts chez Toyota

- Limite la production du poste amont aux besoins exacts du poste aval
- Le nombre de kanban en circulation doit être limité pour éviter la constitution d'en-cours trop importants

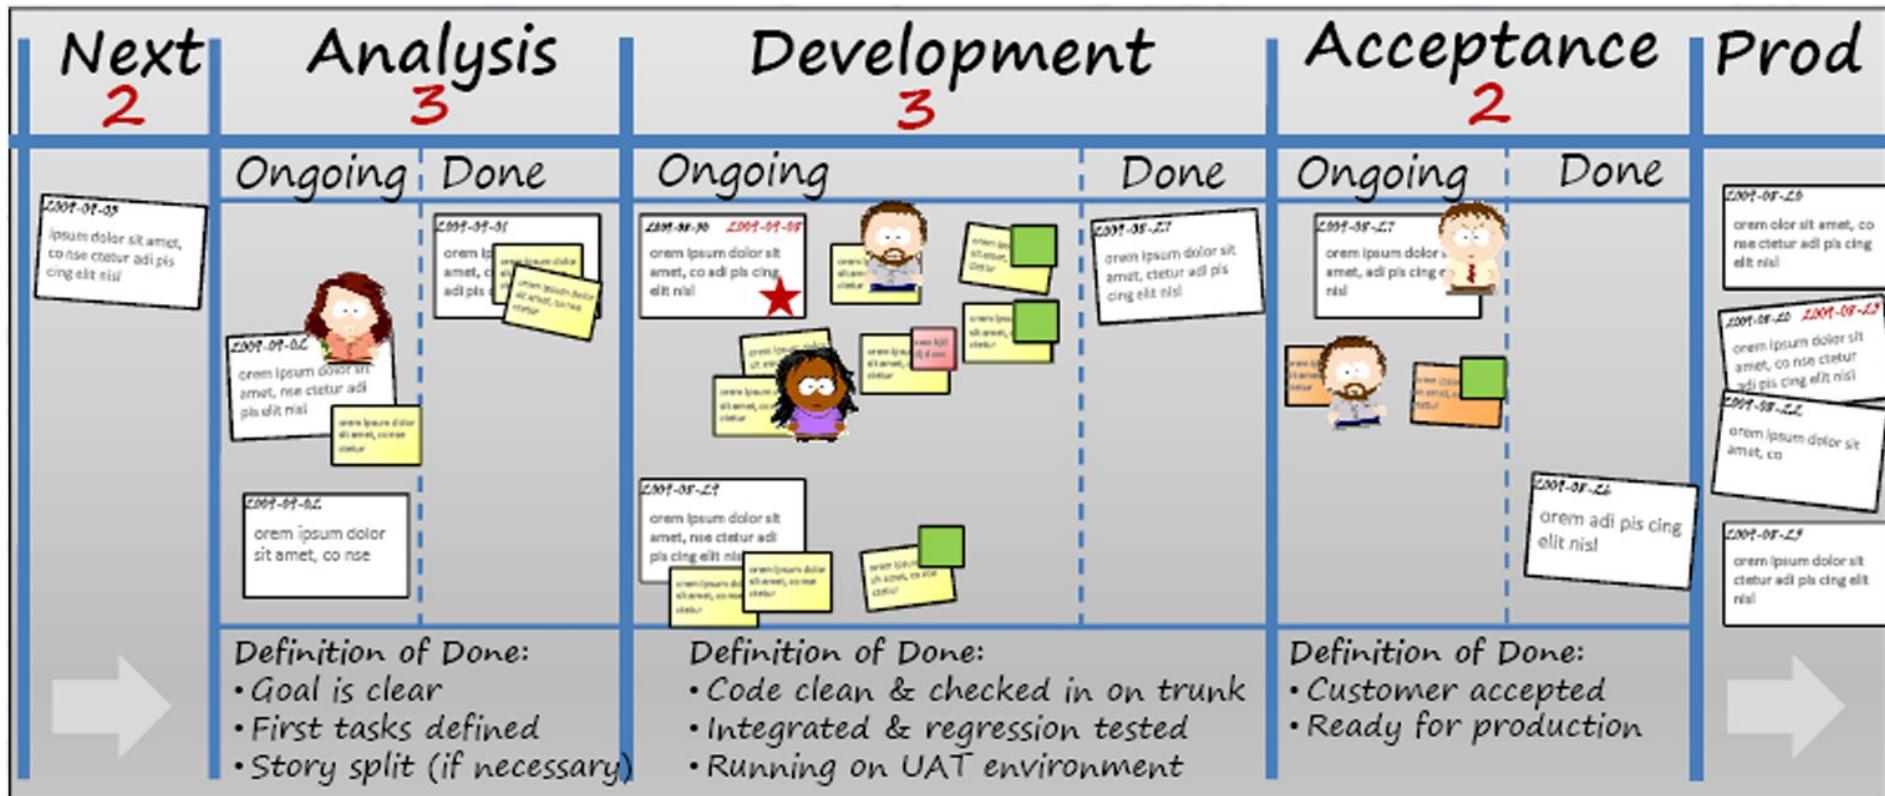

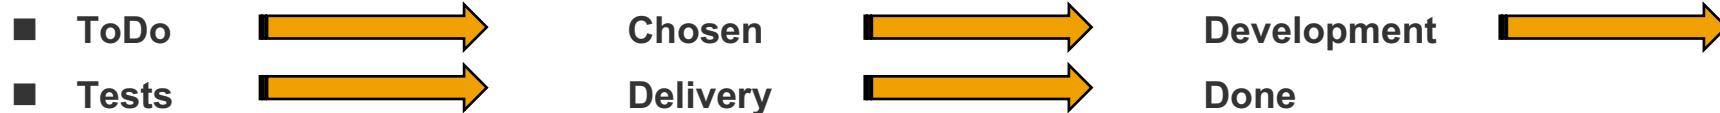

□ Cette méthode est au départ adaptée aux entreprises ayant une production répétitive et relativement régulière

Kanban: exemples d'étapes

□ Au minimum

□ Plus Fin

Kanban sur très gros projets : github.com

To Proofread
Make sure these tickets are healthy, unique, and that you can reproduce the problem with the supplied Steps to Test.

To Improve
These tickets do not contain enough information. Follow up with the reporter and see that they are clarified.

To Consider
These tickets may or may not belong to the vision of this product. Consider them as a team and close them or change their severity.

To Plan
These are open tickets that have not been scheduled to a milestone.

Scheduled
These are open tickets that have been scheduled in a milestone.

Queued
These tickets have been resolved, but are waiting for the current batch to be released before they enter testing.

To Test
These tickets are ready to test. Click on **Testing Reports** to record your testing notes.

4.2 Release Date: 20/Aug/10

Activity Stream

November 30 - 11:00 PM

Michael Friedman closed ECHINA-573 (Popup login window should include an option to sign up for BSN for users who are not in BSN. Ideally, should then return them to same page so they can continue activity but we can live without that.)

November 30 - 6:00 PM

Đồng Văn Tây changed the Time Spent to '79200' on ECHINA-939 (Project Management for version 4.0)

Nguyễn Minh Đạo changed the Time Spent to '16200' on ECHINA-814 (Address Book, Connection, and Profile contact info should match the Plaxo options as shown in screen shot.)

Nguyễn Minh Đạo updated 2 fields of ECHINA-1137 (Javascript bug in IE6 login page)

Nguyễn Minh Đạo updated 2 fields of ECHINA-1135 (Ouchy... please look at Visitors Layout...)

Nguyễn Minh Đạo updated 2 fields of ECHINA-1134 (Not possible to create e-mail subjects properly)

Nguyễn Minh Đạo updated 2 fields of ECHINA-1132 (Industry Reports List, short description content should not be indented.)

Nguyễn Minh Đạo updated 2 fields of ECHINA-1130 (Industry Reports - Price Display - displaying "1.000" instead of "1,000" for end users. Probably locale issue.)

Nguyễn Minh Đạo updated 2 fields of ECHINA-1136 (Double colons in Advanced Search)

Nguyễn Minh Đạo changed the Time Spent to '15300' on ECHINA-425 (Address Book must export to Excel.)
